Summary

Software Engineer skilled in building dynamic, scalable applications. Proficient in JavaScript, React, Node.js, and MongoDB, with a background in both front-end and back-end development. Strong communicator with a passion for creating efficient, user-centered solutions. Skilled in leading cross-functional collaborations, optimizing web applications, and implementing agile development practices

Education

Obafemi Awolowo University

Bachelor of Science | Architecture

Jan 2021 - Nov 2024

ALX_SE

Software Engineering - with specializations in Back-end

[view certificate](#)

Aug 2022 - July 2024

Skills

Programming Languages: Python, C, JavaScript, TypeScript.

Front-End: HTML, CSS, JavaScript, Tailwind CSS, React, Next.js.

Back-end: Node.js, Express, Flask, REST APIs.

Mobile Development: React Native.

Databases: MongoDB, MySQL, NoSQL Databases.

Tools: Git, GitHub.

Deployment: Vercel, Render.

Software Engineering Concepts: Object-Oriented Programming (OOP).

Testing & Debugging: Chrome DevTools, Postman.

Work Experience

Full-Stack Developer - Freelance

Remote

Jan 2024 - Present

- Translated client requirements into innovative, scalable web applications by leading collaborative sessions and employing agile development practices.
- Designed and implemented innovative features that enhanced functionality and improved user retention, earning consistent praise from clients.
- Delivered responsive, high-performance solutions within tight deadlines, ensuring exceptional user experiences and alignment with client objectives.
- Optimized database queries and server response times, improving application performance by 25% and enhancing user experience.

Beta Bridge

Sep 2024 – Oct 2024

Frontend Developer - Contract

- Collaborated with UI/UX designers and other developers to create a visually compelling and fully responsive company website, achieving seamless brand alignment and intuitive user navigation.
- Engineered a high-performance landing page utilizing modern web technologies, significantly reducing load times and enhancing overall site efficiency.
- Contributed to effective cross-functional communication ensuring the on-time delivery of high-quality results, contributing to a 50% faster project completion rate under tight deadlines.

Hack4Naija

Sep 2023 – Oct 2023

Frontend Developer - Intern

- Worked alongside a team of developers to design, develop, and deploy web applications supporting social good initiatives, actively contributing to project planning and implementation phases.
- Participated in agile sprint cycles, ensuring timely delivery of features and bug fixes, while working closely with mentors and senior developers.
- Gained hands-on experience with technologies such as JavaScript, React, Node.js, and Git, while learning industry best practices in software development.

Projects

SketchCV | [view project](#)

- Developed an interactive web application enabling users to create personalized resumes with real-time previews and customizable layout options, prioritizing simplicity and intuitive design.
- **Technologies:** TypeScript, React Vite

GetLinked | [view project](#)

- Engineered a robust web application for managing hackathon registrations, streamlining the sign-up process and enabling efficient participant tracking and management.
- **Technologies:** Next.js

LlamaGPT | [view project](#)

- Developed an intelligent chatbot application utilizing advanced NLP techniques to deliver real-time, context-aware responses, enhancing user engagement and interaction quality.
- **Technologies:** Next.js, Node.js, Replicate API

Squad API Integration | [view project](#)

- Designed and implemented a backend API to facilitate secure account lookups and transfers by seamlessly integrating with the Squad banking API, ensuring reliability and robust performance.
- **Technologies:** Python, Flask, MongoDB, Squad API
